Denmark’s public finances have performed strongly during COVID. Among OECD countries with data for 2020, Denmark had the smallest fiscal deficit (-1.1% of GDP, Figure 2.1) and the third highest primary structural surplus (+1.1% of potential GDP, Figure 2.6).

Chapter 2 – Public finance and economics

Denmark has rejuvenated its public sector workforce in recent years. The proportion of the public sector workforce aged 18-34 has risen from 19% to 29% since 2015. This is the second largest increase in the OECD (Figure 3.6). Denmark has the third largest share of people employed in general government in the OECD (27.6%, Figure 3.1).

Chapter 3 – Public employment

Denmark performs exceptionally on ensuring fundamental rights. Denmark ranks first in the OECD for checks and controls on powers across different branches of government (Figures 13.10), and for respect for fundamental rights (Figure 13.11), such as equal treatment and absence of discrimination, right to life and security, freedom of opinion and expression, among others.

Chapter 13 – Core government results
Government resources

**Government expenditures** (2019, 2020) % of GDP

- 2020: 41%
- 2019: 54%
- 2020: 56%

**Government investment** (2019, 2020) % of GDP

- 2020: 3.4%
- 2019: 3.1%
- 2020: 3.3%

**Fiscal balance** (2019, 2020) % of GDP

- 2019: 3.8%
- 2020: -1.1%

**Government gross debt** (SNA definition, 2019, 2020) % of GDP

- 2019: 48%
- 2020: 58%

**Government expenditures by selected functions** (2019) % of GDP

- Environmental protection: 0.4%
- Education: 6.3%
- General public services: 5.1%
- Health: 6.0%
- Social protection: 5.4%
- Social protection: 7.9%
- Social protection: 21.4%

**Central government workforce by age** (2020)

- 18-34: 29%
- 35-54: 45%
- 55+: 55%

**Share of women in management positions in the central government** (2020)

- Senior management: 37%
- Middle management: 48%

Source: OECD National Accounts
**Public governance practices**

### Composite indices of public service leadership and capability (2020)

From 0 (worst) to 1 (best)

- Development of a diverse workforce: 0.20, 0.20, 0.49, 0.78
- Policies to manage senior civil servants: 0.22, 0.37, 0.49, 0.84

Source: OECD Survey on the composition of the workforce in central/federal governments and OECD Survey on public service leadership and capability

### Green budgeting tools (2021)

- Ex ante or ex post environmental assessment: YES, 12 YES, 2 NO
- Ex ante or ex post green budget tagging: NO, 7 YES, 7 NO

Source: OECD and European Commission – Joint survey on emerging green budgeting practices

### Objectives included in infrastructure and public procurement strategies (2020)

- Public procurement strategy includes responsible business conduct objectives on...
  - Environment: YES
  - Human rights: YES
  - Gender: NO

- Infrastructure strategy includes objectives on...
  - Environment: N. A.
  - Human rights: N. A.
  - Gender: N. A.

Source: OECD Survey on infrastructure governance and OECD Survey on leveraging responsible business conduct through public procurement

### Citizen and stakeholder participation (2020 or 2021)

- Early consultation in the regulation-making process: NOT SYSTEMATIC
  - NOT SYSTEMATIC: 8 SYSTEMATIC, 2 NEVER, 27 NOT SYSTEMATIC

- Centres of government consulted stakeholders on strategies to manage the COVID-19 crisis:
  - YES: 20 YES, 6 NO

Source: OECD Survey on centres of government's role in managing the COVID-19 crisis, OECD open government Survey and OECD indicators of regulatory policy and governance (iREG) Survey

### Digital government index (2019)

Composite index from 0 (worst) to 1 (best)

- Denmark: 0.65
- OECD: 0.51
- Range of OECD country values: 0.65, 0.51, 0.74

Source: OECD Survey on digital government 1.0
Government results

**Citizens who express satisfaction with public services (2020)**

- **Police**: 82% (38 - 92%)
- **Healthcare**: 78% (26 - 93%)
- **Education**: 81% (27 - 92%)
- **Judiciary**: 86% (15 - 91%)

**Citizens who express trust in public institutions (2020)**

- Civil service: 56% (8 - 71%)
- Parliament: 49% (5 - 70%)
- Government: 47% (15 - 85%)

**Citizens who believe they have a say in what government does (2018)**

- 72% (51%)

**Income inequality before taxes and post taxes and transfers (GINI index, 2018)**

- Maximum inequality: 0.41
- Minimum inequality: 0.27

**Figure notes**

- Data on public finance and economics, which are based on the System of National Accounts (SNA), were extracted on 11 May 2021 and data on General government employment were extracted on 12 April 2021. The range of country values refers to year 2019.
- Fiscal balance as reported in SNA framework, also referred to as net lending (+) or net borrowing (-) of government, is calculated as total government revenues minus total government expenditures.
- Government gross debt is reported according to the SNA definition, which differs from the definition applied under the Maastricht Treaty. It is defined as all liabilities that require payment or payments of interest or principal by the debtor to the creditor at a date or dates in the future. All debt instruments are liabilities, but some liabilities such as shares, equity and financial derivatives are not debt.
- The range of country values for the central government workforce by age refers to the 18-34 group.
- Data on trust in the civil service and parliament are 2018 for most countries.
- The range of country values for share of women in management positions in the central government refers to senior management.
- Citizens who express satisfaction with public services: for the judiciary and the police, the data reflect the proportion of citizens who express having confidence in the institution.
- The range of country values for income inequality before taxes and post taxes and transfers refers to GINI after taxes and transfers for the working age population.

**Government at a Glance 2021**

Published every two years, Government at a Glance provides reliable, internationally comparable indicators on government activities and their results in OECD countries.

The 2021 edition includes input indicators on public finance and employment; while processes include data on institutions, budgeting practices and procedures, human resources management, regulatory governance, public procurement, the governance of infrastructure, public sector integrity, open government and digital government. Outcomes cover core government results (e.g. trust, political efficacy, inequality reduction) and indicators on access, responsiveness, quality and citizen satisfaction for the education, health and justice sectors. Governance indicators are especially useful for monitoring and benchmarking governments’ progress in their public sector reforms.

Each indicator in the publication is presented in a user-friendly format, consisting of graphs and/or charts illustrating variations across countries and over time, brief descriptive analyses highlighting the major findings conveyed by the data, and a methodological section on the definition of the indicator and any limitations in data comparability.

The Excel spreadsheets used to create the tables and figures in Government at a Glance 2021 are available via the StatLinks provided throughout the publication: https://doi.org/10.1787/1c258f55-en
