Government at a Glance 2021
Country Fact Sheet

Italy

Italy's high public debt worsened during COVID. Italy had the third highest public debt level among OECD countries in 2019 (155% of GDP, Figure 2.8). The primary deficit worsened from -1.6% of GDP in 2019 to -6.2% in 2020 (Figure 2.2). This will add to debt pressures.

Chapter 2 – Public finance and economics

Figure 2.2. General government primary balance and net interest spending as a percentage of GDP, 2019 and 2020

Figure 2.8. General government gross debt as a percentage of GDP, 2007, 2019 and 2020

Italy is a leader in youth representation in politics, but has the OECD's oldest civil service. Italy is fourth among OECD countries for members of parliament aged under 40 (Figure 3.1). However, 48% of central government staff are 55 or older, the highest proportion among OECD countries (Figure 3.5).

Chapter 3 – Public employment

Figure 3.1. Employment in general government as a percentage of total employment, 2007 and 2019

Figure 3.5. Percentage of central government employees aged 55 years or older, 2015 and 2020

Italy is above average on digital government, and could examine how this might improve citizen engagement and service delivery. Italy scored above average on the OECD Digital Government Index (Figure 10.1). However, it has the lowest score for citizens' confidence in their ability to have a say in what government does, among 25 OECD countries (Figure 13.5), and performs poorly on some indicators of access to and responsiveness of health, education and justice systems (Scorecards 1, 2, 3).

Chapter 10 – Digital government

Figure 10.1. OECD Digital Government Index, 2019

Chapter 13 – Digital government

Figure 13.5. Having a say in what the government does, 2016 and 2018 (or nearest year)

Chapter 14 – Serving citizens
Public governance practices

Composite indices of public service leadership and capability (2020)
From 0 (worst) to 1 (best)

- Development of a diverse workforce: 0.42
- Policies to manage senior civil servants: 0.49

Green budgeting tools (2021)

- Ex ante or ex post environmental assessment: YES (12 YES 2 NO)
- Ex ante or ex post green budget tagging: YES (7 YES 7 NO)

Objectives included in infrastructure and public procurement strategies (2020)

- Public procurement strategy includes responsible business conduct objectives on...
  - Environment: YES (21 YES 5 NO)
  - Human rights: YES (13 YES 13 NO)
  - Gender: NO (8 YES 18 NO)

- Infrastructure strategy includes objectives on...
  - Environment: YES (19 YES 5 NO)
  - Human rights: NO (5 YES 19 NO)
  - Gender: NO (7 YES 17 NO)

Citizen and stakeholder participation (2020 or 2021)

- Early consultation in the regulation-making process
  - SYSTEMATIC: 8 SYSTEMATIC 2 NEVER
  - NOT SYSTEMATIC: 27 NOT SYSTEMATIC

- Centres of government consulted stakeholders on strategies to manage the COVID-19 crisis
  - YES: 20 YES 6 NO

- Centres of government portal(s) for carrying out online consultations
  - YES: 22 YES 10 NO

Digital government index (2019)
Composite index from 0 (worst) to 1 (best)

- Italy: 0.53
- OECD: 0.51
- Range of OECD country values: 0.26 to 0.74

Government results

Government provides information on law enforcement, due process and respect of human rights (2020)
Composite index from 0 (worst) to 1 (best)

Citizens who express trust in public institutions (2020)

Citizens who believe they have a say in what government does (2018)

Citizens who express satisfaction with public services (2020)

Income inequality before taxes and post taxes and transfers (Gini index, 2018)

Figure notes
- Data on public finance and economics, which are based on the System of National Accounts (SNA), were extracted on 12 April 2021. The range of country values refers to year 2020.
- Fiscal balance as reported in SNA framework, also referred to as net lending (+) or net borrowing (-) of government, is calculated as total government revenues minus total government expenditures.
- Government gross debt is reported according to the SNA definition, which differs from the definition applied under the Maastricht Treaty. It is defined as all liabilities that require payment or payments of interest or principal by the debtor to the creditor at a date or dates in the future. All debt instruments are liabilities, but some liabilities such as shares, equity and financial derivatives are not debt.
- The range of country values for the central government workforce by age refers to the 18-34 group.
- Data on trust in the civil service and parliament are 2018 for most countries.
- The range of country values for share of women in management positions in the central government refers to senior management.
- Citizens who express satisfaction with public services: for the judiciary and the police, the data reflect the proportion of citizens who express having confidence in the institution.
- The range of country values for income inequality before taxes and post taxes and transfers refers to Gini after taxes and transfers for the working age population.

Government at a Glance 2021

Published every two years, Government at a Glance provides reliable, internationally comparable indicators on government activities and their results in OECD countries.

The 2021 edition includes input indicators on public finance and employment; while processes include data on institutions, budgeting practices and procedures, human resources management, regulatory governance, public procurement, the governance of infrastructure, public sector integrity, open government and digital government. Outcomes cover core government results (e.g. trust, political efficacy, inequality reduction) and indicators on access, responsiveness, quality and citizen satisfaction for the education, health and justice sectors. Governance indicators are especially useful for monitoring and benchmarking governments’ progress in their public sector reforms.

Each indicator in the publication is presented in a user-friendly format, consisting of graphs and/or charts illustrating variations across countries and over time, brief descriptive analyses highlighting the major findings conveyed by the data, and a methodological section on the definition of the indicator and any limitations in data comparability.

The Excel spreadsheets used to create the tables and figures in Government at a Glance 2021 are available via the StatLinks provided throughout the publication: https://doi.org/10.1787/1c25af5f5-en
