Colombia experienced the largest decrease in public investment in LAC between 2009 and 2014

Public investment in Colombia reached 5.1% of GDP in 2009 and decreased to 3.1% in 2014, the highest reduction in the LAC region for that period and substantially higher than the average reductions in both LAC (0.6 p.p.) and OECD (0.9 p.p.). However, even after the decline, in 2014 public investment was still the third highest in the region. The fall in public investment could be explained by the volatility of commodity prices, notably crude oil, resulting in a reduction of government revenues, but also by weaker economic growth compared to previous years.

Chapter 2: Public finance and economics

Colombia reported the highest public procurement expenditure of the region

Colombia consistently spent the most on public procurement as a share of GDP: 13.2% in 2014, which is significantly above the LAC average (7.7% in 2014). The Colombian procurement agency Colombia Compra Eficiente has promoted efficiency in the use of public funds, and actively disseminated public procurement information through the SECOP e-procurement system.

Chapter 9: Public Procurement
9.10. Role of procurement regulatory agencies, 2015

The Colombian government has made strides to open its data

Colombia ranks first in LAC on the OECD’s OURdata index with a score of 0.76, above the LAC and OECD averages (0.44 and 0.56, respectively). Colombia has established a framework for opening data with a focus on adding value to meet citizens’ and agencies’ needs. However, there are still challenges, notably overcoming resistance from data providers who perceive the opening process as complex and fear losing control over their data.

### Public Finance & Economics

#### Government Revenues (2014) % of GDP

- **Colombia**: 27.7%

- **Average of LAC country values in grey**: 33.1%

- **Average of OECD country values in blue**: 40%

- **Range of LAC country values in grey**: 10% to 50%

- **Source**: IMF World Economic Outlook database

#### Government Expenditures (2014) % of GDP

- **Colombia**: 28.6%

- **Average of LAC country values in grey**: 31%

- **Average of OECD country values in blue**: 40%

- **Range of LAC country values in grey**: 10% to 50%

- **Source**: IMF World Economic Outlook database

#### Government Investment (2014) % of GDP

- **Colombia**: 2.6%

- **Average of LAC country values in grey**: 3.1%

- **Average of OECD country values in blue**: 5%

- **Range of LAC country values in grey**: 1% to 6%

- **Source**: IMF Government Finance Statistics database

#### Government Gross Debt (2014) % of GDP

- **Colombia**: 44.3%

- **Average of LAC country values in grey**: 50.4%

- **Range of LAC country values in grey**: 0% to 150%

- **Source**: IMF World Economic Outlook database

#### Fiscal Balance (2014) % of GDP

- **Colombia**: -1.8%

- **Average of LAC country values in grey**: -4.5%

- **Source**: IMF World Economic Outlook database

#### Breakdown of Tax Revenues (2014) % of total taxation

- **Colombia**:
  - Goods and services: 32.7%
  - Income and profits: 37.3%
  - Social security: 16.4%
  - Other: 12.6%

- **Source**: OECD Revenue Statistics in Latin America (database)

### Public Employment and Compensation

#### Public Sector Employment as % of Total Employment (2014)

- **Colombia**: 4.0%

- **Global**: 12.0%

- **Source**: International Labour Organization (database)

#### Public Sector Employment Filled by Women (2014)

- **Colombia**: 49.0%

- **Global**: 50.3%

- **Source**: International Labour Organization (database)

How to read the figures:

- **Country value in green** (not represented if not available)
- **Average of LAC country values in grey**
- **Average of OECD country values in blue**
- **Range of LAC country values in grey**

Values have been rounded. **n.a.** refers to data not available.

Government at a Glance: Latin America and the Caribbean 2017

Government at a Glance: Latin America and the Caribbean 2017 is the second edition of a joint publication between the Organization for Economic Co-operation and Development (OECD) and the Inter-American Development Bank (IDB). It provides readers with a dashboard of key indicators to inform policy making and benchmark specific interventions. The model is the OECD Government at a Glance, which is a fundamental reference, backed by a well-established methodology for OECD member countries. Compared to the previous edition that had a special focus on Public Financial Management and alongside with indicators on public finances and public employment this second version covers a wider range of public management areas including the role and influence of the Centre of Government, Open Government and Open Data policies, Digital Government, Regulatory Governance and practices for Budgeting in health systems.
