

# **The Danish Approach to Critical Infrastructure Protection**

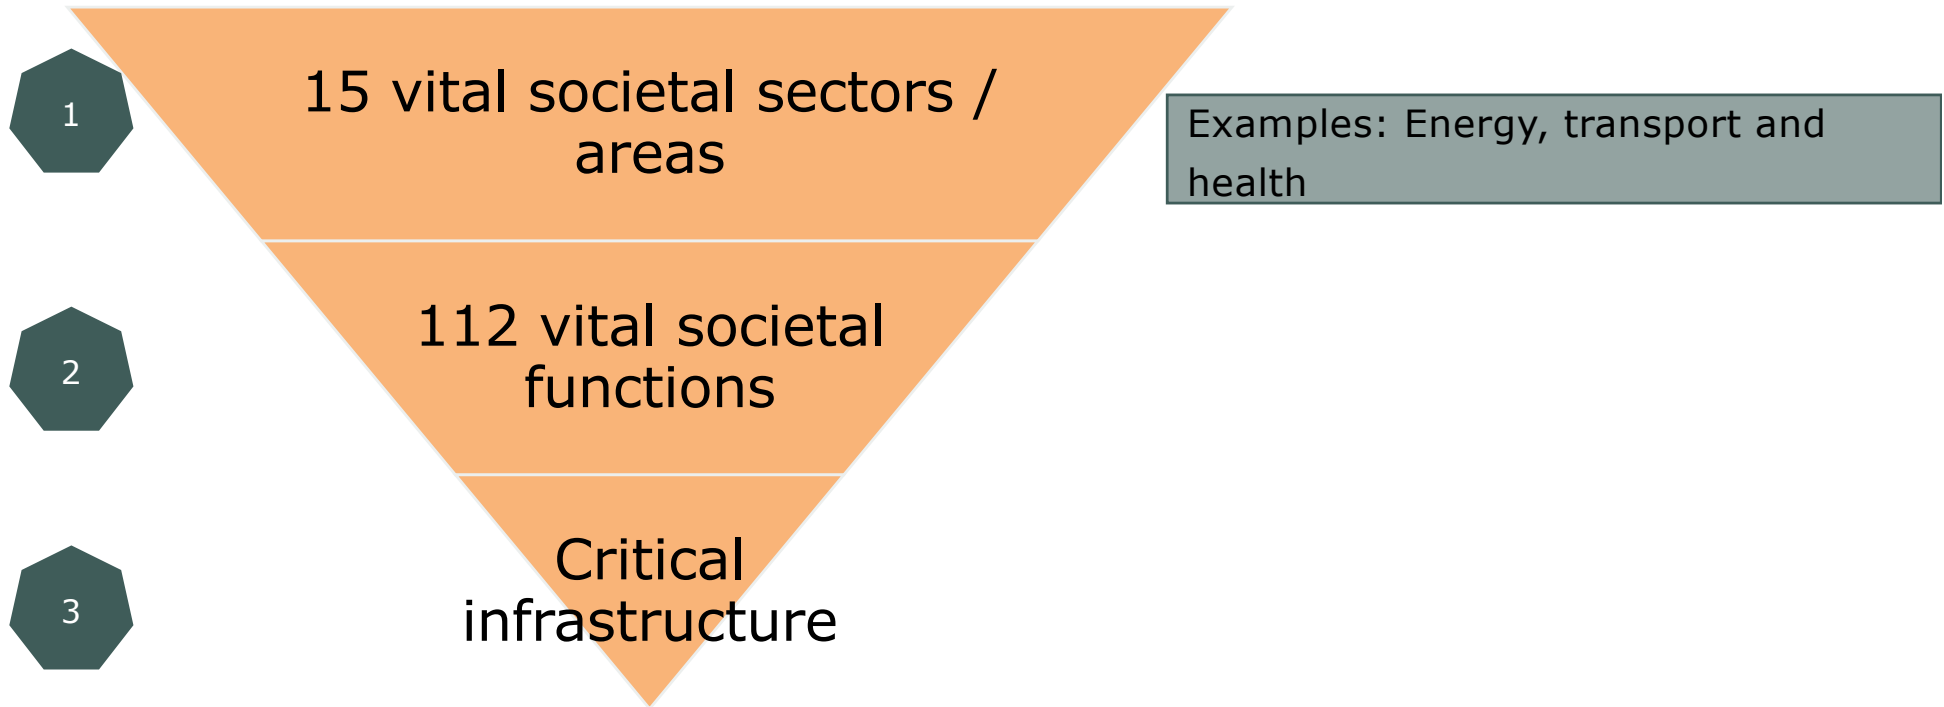

Susanne Klint Poulsen  
Deputy Head of Department  
DEMA

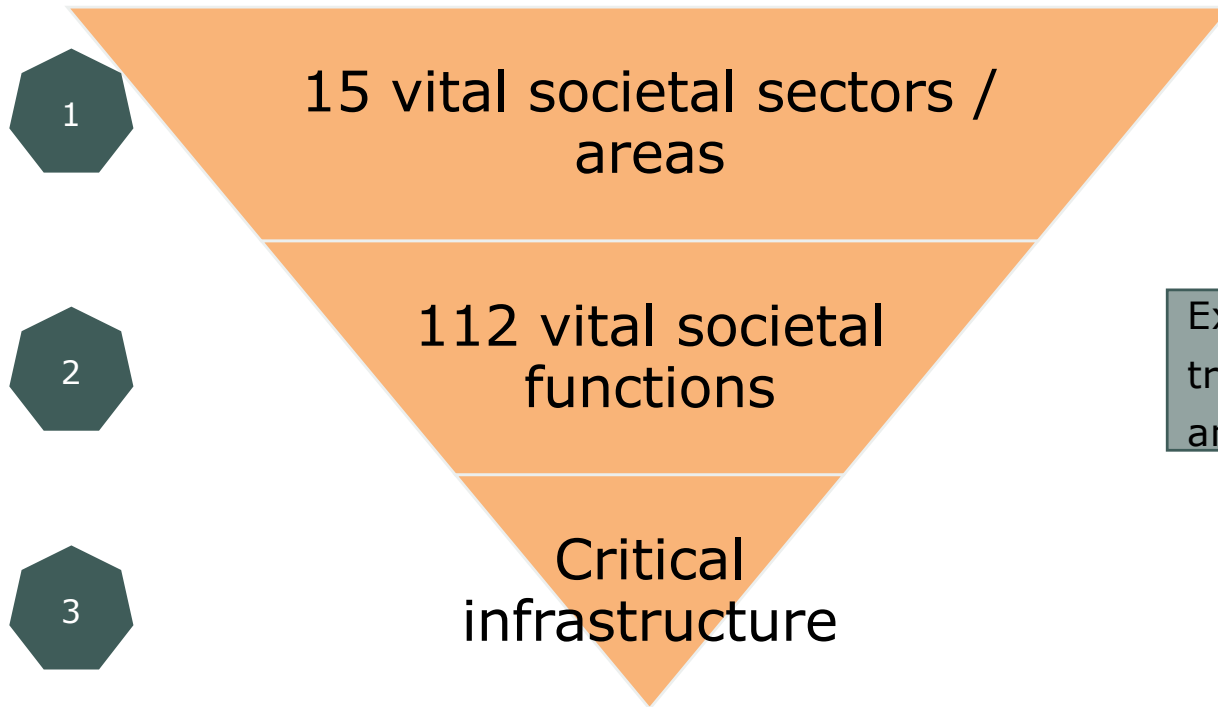

---

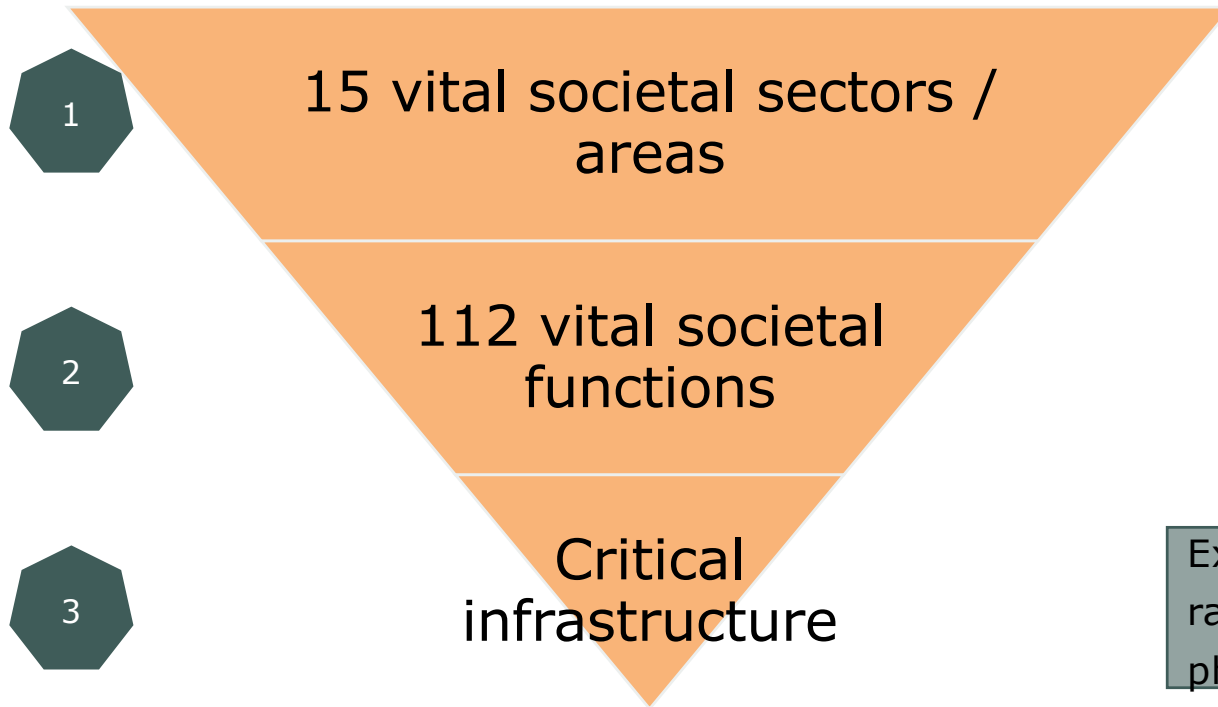

## **The Danish definition of critical infrastructure:**

**“Infrastructure - including facilities, systems, processes, networks, technologies, assets and services - that is necessary to maintain or restore vital societal functions”.**

Examples: Electricity transmission,  
transportation of goods via railway  
and distribution of pharmaceuticals

Examples: Main transformer stations,  
railway hubs and core  
pharmaceutical distributions centres
