

Dr. Stanley Yip

**Professor, Centre of Urban Planning & Design, Peking University
Beijing, People's Republic of China**

Dr. Stanley Yip is an experienced urban planner and land economist with 30 years of professional and senior management experience around the world in Canada, Mainland China, Hong Kong, Taiwan and Southeast Asia. Over the last 10 years, Dr. Yip has been leading a series of major low carbon urban development and eco-planning projects in China and was previously Director of Planning and Development for Arup in China. He subsequently pioneered the teaching course in Climate Change and Urban Planning in Peking University. In addition, he is also steering major research projects in the areas of climate change, low carbon city planning, economics of eco-cities and green buildings and green finance in association with the China Ministry of Housing and Urban-Rural Development (MOHURD) as well as other prominent research institutes in China. He is currently research Advisor to the Centre of Housing Industrialization of the MOHURD. He is also the Past President of the Hong Kong Institute of Planners.
