

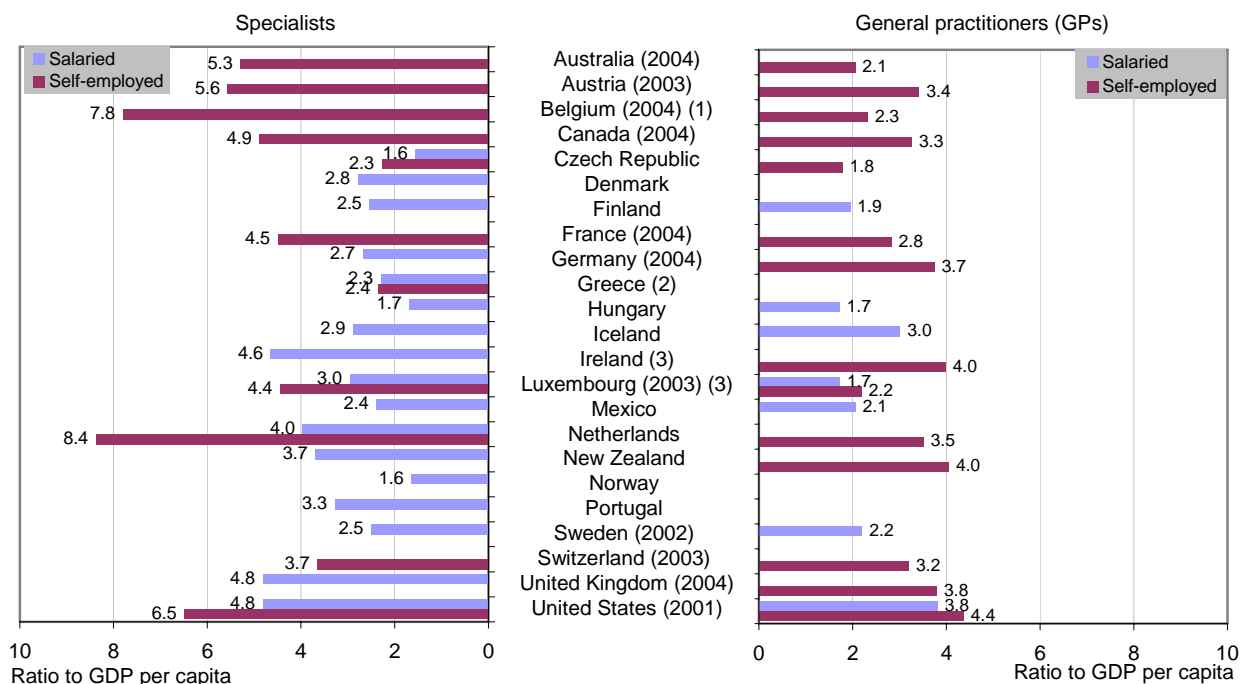

Chart 2. Physicians' remuneration, specialists and general practitioners, OECD countries, 2005

(1) Data for self-employed specialists and GPs in Belgium include practice expenses resulting in an over-estimation.
 (2) Remuneration of salaried specialists in Greece is for 2005 while it relates to 2004 for self-employed specialists.
 (3) Given that GDP per capita overstates the average income, gross national income (GNI) is used for Ireland and Luxembourg.
