ADMINISTRATOR (GRADE A2/A3), RADIATION PROTECTION AND WASTE MANAGEMENT DIVISION, NUCLEAR ENERGY AGENCY

Closing date for applications: 26 July 1994

The OECD is an equal opportunity employer and encourages applications from female candidates

Duties

Under the supervision of the Head of Division and in collaboration with senior professional staff, the post-holder will be required to:

1. Contribute to various scientific and technical activities of the Division in the field of radioactive waste management, with emphasis on the characterisation and evaluation of potential disposal sites and safety assessment methodologies concerning radioactive waste disposal concepts. This will include participation in expert groups and in the secretariat of internationally co-ordinated projects on geological disposal and long-term assessment of disposal systems.
2. Contribute to the implementation and co-ordination of scientific activities under the guidance of the Radioactive Waste Management Committee on various technical and policy subjects, including regulatory matters and the setting up of co-operative R&D projects.

3. Prepare reports and documents for technical committees and participate in the drafting of publications for a wider audience.

Principal qualifications

1. University degree in physics, chemistry or geology or equivalent training. Previous involvement in policy, technical, environmental and safety aspects of radioactive waste management is essential. Practical experience in radiation protection matters and the use of computer techniques, notably for environmental modelling and safety assessment would be an advantage.

2. Experience in the preparation and drafting of technical policy reports and documents.

3. Very good knowledge of and ability to draft in one of the two official languages of the Organisation (English or French). Knowledge of the other language would be an advantage.
