Accelerating a Network Model of Care:
Taking a Social Innovation to Scale
Tyze creates personal, private, secure, online networks.
No one should have to face illness, disability or caregiving on their own

Isolation is costly.
Health effects of isolation have been found to be more hazardous than smoking.
I was reflecting today how meaningful it's been for me to be a member of Kim's network. Being with you all on this journey has been amazing and inspiring.

Kim really wants to take Ken to a Seahawks game and I say we help her make it happen! Who’s in?
Network Model of Care

- Health Care Provider
  - Uses File Drop to share information
- Daughter
  - Uses Tyze Mobile to connect on-the-go
- Neighbour
  - Schedules appointments on the shared calendar
- Friend
- Son
- Personal Care Worker
- Sister
Network Model of Care

Neighbour
I always check the online menu before I go shopping to see what Kim needs.

Friend

Daughter
I’m part of a team now—What a huge relief.

Support Group

Accupuncturist

Doctor
Now it’s easy to share Kim’s test results with her selected network members.

Personal Care Worker
I posted about the loose handrail on the front step and Kim’s network handled it right away.
Tyze Strengthens Connections

Visit our forum to chat about any kind of topic with other SharedLivesPlus members...

Donate to help us bring family and community based care and support to many more people....
Governments, health and social care providers benefit from cost efficiencies and increased service effectiveness by employing collaborative approaches to care.
Jane is 1 of 5.4 million people in the United States with dementia.

Nursing Home Stays
Increasing home stay day by 1 day for 1% of persons with Alzheimer’s = $118,260,000

Increasing home stay day by 1 day for 10% of persons with Alzheimer’s = $1,182,600,000

Assisted Living Facility Care
Reducing 1 month in stay in assisted living facility for 1% of persons with Alzheimer’s = $1,690,740,000

Reducing 1 month in stay in assisted living facility for 10% of persons with Alzheimer’s = $16,907,400,000

Home Care Reductions
Reducing need for 1 hour of home care/mth for 1% of persons with Alzheimer’s = $136,080,000

Reducing the need for 1 hour of home care/mth for 10% of persons with Alzheimer’s = savings of $1,360,800,000
Four Merging Trends
Innovation Requires

• New Mindset –
• reframing of the problem
• New approaches to problem solving
• New ways of working together
• New uses of money and community resources
Social Innovation

Disruptive Innovators

Bridging Innovators

Social Innovation

Receptive Innovators
Everyone Benefits
