

3) For individuals it is a twelve-digit code

N	N	N	N	X	X	X	X	X	X	C	C
---	---	---	---	---	---	---	---	---	---	---	---

The INN is generated as a digital code comprised of a sequence of digits which characterize:

1) NNNN (4 digits)

For Russian organizations and individuals – code of the tax authority which assigned the INN.

For foreign organizations – index defined by the Federal Tax Service.

2) XXXXX (XXXXXX)

For Russian organizations (individuals) – a sequence number of the person’s entry in the territorial section of the Unified State Register of Taxpayers (USRT). It consists of 5 digits in case of organizations and 6 digits in case of individuals.

For foreign organizations – code of foreign organization according to the reference book “Foreign Companies Coding”.

3) C (CC) – control number (1 digit for organization, 2 digits for individuals)

It is generated according to a unique algorithm set by the Federal Tax Service.

Section III – Where to find TINs?

INN can be found from the certificate of registration of an individual or business as a taxpayer.

Note: INN is not related to the passport number.

Section IV – TIN information on the domestic website
