<b>Notes:</b>													
Definition of a MAP case and counting of MAP cases		Slovenia used the definition of MAP cases and the counting method based on the reporting framework arising from the proposals in the CFA report "Improving the Resolution of Tax Treaty Disputes".											
Category of cases		For purposes of reporting pre-2016 cases the same definitions were used to categorise attribution/allocation cases and other cases as are provided for in items (c) and (d) of Annex D of the MAP Statistics Reporting Framework.											
Notes on the computation of average time		<p>For purposes of computing average time taken to resolve pre-2016 cases, Slovenia used:</p> <ul style="list-style-type: none"> <li>- as the start date: (i) the date when the MAP request was received, (ii) the date when missing information was received by the taxpayer to supplement the request or (iii) the date when we were informed about the initiation of a MAP case from the other competent authority,</li> <li>- as the end date, one of the following dates: (i) the date when the taxpayer was informed of the outcome of the MAP, (ii) the date when the notification from the other competent authority was received that the taxpayer was notified of or accepted the MAP outcome or (iii) the date when the competent authority formally closed the MAP case.</li> </ul> <p>Calculation of the average time taken was computed as follows: The number of months taken for each case was computed as the number of days taken from the "start" date to the "end" date divided by 365 and multiplied by 12 (rounded to 2 decimal places). Then this aggregated number of months was divided by the total number of cases where the "end" date for the case falls within the reporting period.</p>
