Row 2	Notes:												
Row 3	1) In consideration of the dissolution of the taxpayer, the competent authorities of Italy and Denmark agreed to close the two cases with outcome "any other outcome".												
	2) The competent authorities failed to reach an agreement in the bilateral phase with a de minimis partner because a domestic statute of limitation would prevent any resulting agreement from being implemented.												
	3) One MAP case with France was not counted in 2019 and therefore the inventory on 1 January 2020 is 108 cases instead of 107 cases. In addition, two MAP cases were mistakenly counted with Spain in 2019 and so, the start inventory is 40 cases instead of 42 cases.

- (i) start date: the date of filing of the MAP request to the Italian competent authority or the date of receipt of the notification letter from the competent authority that received the MAP request from the taxpayer; and
- (ii) end date: one of the following ones: the date when the taxpayer is informed of the outcome of the MAP process, or the date of the closing letter received from the other competent authority, or the date of the judgment that resolved the dispute at stake.

The average time is calculated by first aggregating the number of months it took to complete or close each case (including any withdrawn case) that was completed, closed or withdrawn during the reporting period, from the date of initiation until the date of completion, closure or withdrawal. The second step is to divide this aggregated number of months by the total number of such completed, closed, and withdrawn cases.

Cases started as from 1 January 2016	Start to End	Receipt to Start	Start to Milestone 1	Milestone 1 to End
Transfer pricing cases	4.96	1.15	n.a.	n.a.
Other cases	2.28	1.15	n.a.	n.a.

Note: the average times to close MAP cases that started **as from 1 January 2016** were computed according to the MAP statistics reporting framework available at <http://www.oecd.org/tax/dispute/mutual-agreement-procedure-statistics-reporting-framework.pdf>

MAP Statistics prior to 2016

Background

In 2006 the OECD began to compile annual statistics on the mutual agreement procedure (MAP) caseloads of all its member countries and of partner economies that agreed to provide such statistics. The statistics for each reporting period up to 2015 (generally a calendar year) included:

- opening inventory of MAP cases on the first day of the reporting period;
- number of MAP cases initiated during the reporting period;
- number of MAP cases completed during the reporting period;
- ending inventory of MAP cases on the last day of the reporting period;
- cases closed or withdrawn with double taxation during the reporting period; and
- average cycle time for cases completed, closed or withdrawn during the reporting period.

Note on the calculation of MAP Statistics for 2006-2015

The MAP Statistics for 2006-2015 (pre-*MAP Statistics Reporting Framework*⁶⁶) were provided by reporting jurisdictions based on their own methodology without following a common reporting framework and thus, are presented differently from the Statistics available for 2016 and onwards (that follow the *MAP Statistics Reporting Framework*).
