*The Africa (30) average is not available before 2009 due to missing data in some countries. In 2009, it is calculated based on estimated tax-to-GDP ratios for Chad and Nigeria in that year, as data were not available prior to 2010 in these countries.

Tax-to-GDP ratio, 2019

Cameroon's tax-to-GDP ratio in 2019 (14.2%) was lower than the average of the 30 African countries in Revenue Statistics in Africa 2021 (16.6%) by 2.5 percentage points.

In the OECD classification the term “taxes” is confined to compulsory unrequited payments to general government. Taxes are unrequited in the sense that benefits provided by government to taxpayers are not normally in proportion to their payments. Non-tax revenues are all other government revenues that are not classified as taxes. http://www.oecd.org/tax/tax-policy/oecd-classification-taxes-interpretative-guide.pdf
