## Tax revenues: tax-to-GDP ratio

### Tax-to-GDP ratio over time

The tax-to-GDP ratio in the Republic of the Congo<sup>1</sup> decreased by 5.1 percentage points from 13.6% in 2017 to 8.5% in 2018. In comparison, the average\* for the 30 African countries increased by just under 0.1 percentage points over the same period, and was 16.5% in 2018. Since 2010, the average for the 30 African countries has increased by 1.4 percentage points, from 15.1% in 2010 to 16.5% in 2018. Over the same period, the tax-to-GDP ratio in the Republic of the Congo has increased by 1.0 percentage points, from 7.5% to 8.5%. The highest tax-to-GDP ratio in the Republic of the Congo was 17.8% in 2015, with the lowest being 4.3% in 2000.

\*The Africa (30) average was 16.5% in both 2017 and 2018 due to rounding. The Africa (30) average is not available before 2009 due to missing data in some countries. In 2009, it is calculated based on estimated tax-to-GDP ratios for Chad and Nigeria in that year, as data were not available prior to 2010 in these countries.

### Tax-to-GDP ratio, 2018

The Republic of the Congo's<sup>1</sup> tax-to-GDP ratio in 2018 (8.5%) was lower than the average of the 30 African countries in Revenue Statistics in Africa 2020 (16.5%) by 8.0 percentage points and also lower than the Latin America and the Caribbean (23.1%).

<sup>1</sup> The tax-to-GDP ratio of the Republic of the Congo excludes social security contributions as the data are not available.

In the OECD classification the term "taxes" is confined to compulsory unrequited payments to general government. Taxes are unrequited in the sense that benefits provided by government to taxpayers are not normally in proportion to their payments. Non-tax revenues are all other government revenues that are not classified as taxes. <http://www.oecd.org/tax/tax-policy/oecd-classification-taxes-interpretative-guide.pdf>

The LAC average refers to the *Revenue Statistics in Latin America and the Caribbean 2020* publication. [oe.cd/revenue-statistics-in-latin-america-and-the-caribbean](http://oe.cd/revenue-statistics-in-latin-america-and-the-caribbean)

## Tax revenues: structure

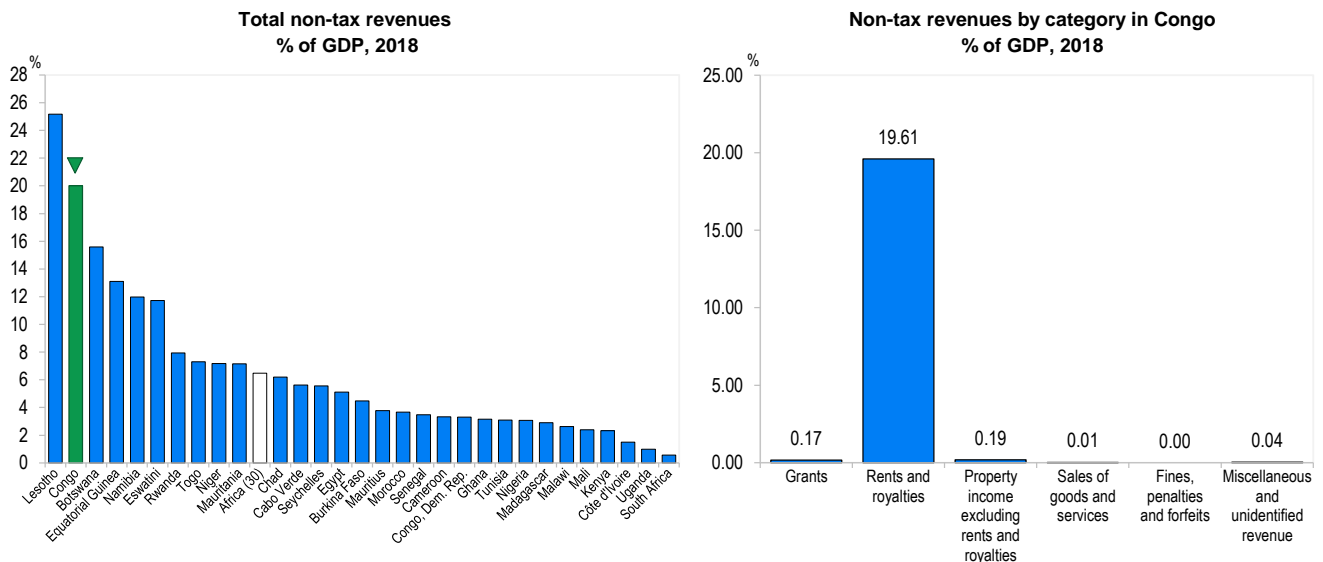

Tax structure refers to the share of each tax in total tax revenues. The highest share of tax revenues in the Republic of the Congo<sup>1</sup> in 2018 was contributed by taxes on goods & services other than VAT (31%). The second-highest share of tax revenues in 2018 was derived from value added taxes (VAT) (27%).

<sup>1</sup> The tax-to-GDP ratio of the Republic of the Congo excludes social security contributions as the data are not available. \*The data for the OECD are for 2017 as the data for 2018 are not available.

## Non-tax revenues

In 2018, the Republic of the Congo's non-tax revenues amounted to 20.0% of GDP. This was higher than the average non-tax revenues for the 30 African countries (6.5% of GDP). Rents and royalties represented the largest share of non-tax revenues in 2018, amounting to 19.6% of GDP and 97.9% of non-tax revenues.
