Revenue Statistics in Africa 2023 — Kenya

**Tax revenues: tax-to-GDP ratio**

**Tax-to-GDP ratio over time**

The tax-to-GDP ratio in Kenya decreased by 0.6 percentage points from 15.8% in 2020 to 15.2% in 2021. In comparison, the average* for the 33 African countries within the Revenue Statistics in Africa 2023 publication has remained unchanged over the same period, and was 15.6% in 2021. Since 2010, the average for the 33 African countries has increased by 1.5 percentage points, from 14.1% in 2010 to 15.6% in 2021. Over the same period, the tax-to-GDP ratio in Kenya has decreased by 0.7 percentage points, from 15.9% to 15.2%. The highest tax-to-GDP ratio reported for Kenya since 2000 was 17.5% in 2017, with the lowest being 12.5% in 2002.

Since 2010, the average for the 33 African countries has increased by 1.5 percentage points, from 14.1% in 2010 to 15.6% in 2021. Over the same period, the tax-to-GDP ratio in Kenya has decreased by 0.7 percentage points, from 15.9% to 15.2%. The highest tax-to-GDP ratio reported for Kenya since 2000 was 17.5% in 2017, with the lowest being 12.5% in 2002.

---

* The Africa (33) average is not available before 2009 due to missing data in some countries. In 2009, it is calculated based on estimated tax-to-GDP ratios for Chad, Gabon and Nigeria in that year, as data were not available prior to 2010 in these countries. Annual changes are rounded to one decimal place. Due to rounding, sums and differences of reported figures might differ from the actual values.

**Tax-to-GDP ratio, 2021**

Kenya's tax-to-GDP ratio in 2021 (15.2%) was slightly lower than the average of the 33 African countries in 2023 (15.6%) by 0.4 percentage points.

---

* The Latin America and the Caribbean (LAC) and the Asia-Pacific (29) averages refer to the respective 2023 regional publications. For more information see https://oe.cd/revstatslac and https://oe.cd/revstatsap.

In the OECD classification the term “taxes” is defined as compulsory unrequited payments to general government. Taxes are unrequited in the sense that benefits provided by government to taxpayers are not normally in proportion to their payments. Non-tax revenues are all other government revenues that are not classified as taxes. For more information, see https://www.oecd.org/tax/tax-policy/oecd-classification-taxes-interpretative-guide.pdf
**Revenue Statistics in Africa** is a collaboration between ATAF, AUC and the OECD, with the financial support of the EU. It contributes to the implementation of the second phase of the Pan-African Statistics Programme, a joint AU-EU initiative. For more information see: OECD/ATAF/AUC (2023), Revenue Statistics in Africa 2023, OECD Publishing, Paris. [https://oe.cd/revstatsafrica](https://oe.cd/revstatsafrica)

**Tax revenues: structure**

Tax structure refers to the share of each tax in total tax revenues. The highest share of tax revenues in Kenya in 2021 was contributed by taxes on goods and services other than VAT (32%). The second-highest share of tax revenues in 2021 was derived from value added taxes (VAT) (24%).
