Taxing Wages - France

Tax on labour income

The **tax wedge** is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

The tax wedge for the average single worker in France decreased by 0.6 percentage points from 47.2% in 2019 to 46.6% in 2020. The OECD average tax wedge in 2020 was 34.6% (2019, 35.0%). In 2020, France had the 4th highest tax wedge among the 37 OECD member countries, compared with the 5th in 2019.

In France, income tax and employer social security contributions combine to account for 82% of the total tax wedge, compared with 76% of the total OECD average tax wedge.

Child-related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In France in 2020, this reduction (8.8 percentage points) was less than the OECD average (10.2 percentage points).

France had the 2nd highest tax wedge in the OECD for an average married worker with two children at 37.9% in 2020, which compares with the OECD average of 24.4%. The country occupied the same position in 2019.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In France in 2020, this reduction (8.8 percentage points) was less than the OECD average (10.2 percentage points).
Tax wedge trends between 2000 and 2020

In France, the tax wedge for the average single worker decreased by 3.8 percentage points from 50.4% to 46.6% between 2000 and 2020. During the same period, the average tax wedge across the OECD decreased by 1.8 percentage points from 36.4% to 34.6%.

Between 2009 and 2020, the tax wedge for the average single worker decreased by 3.2 percentage points in France. During this same period, the tax wedge for the average single worker across the OECD increase slowly to 35.5% in 2013 and 2015 before decreasing back to 34.6% in 2020.

Average tax wedge over time for a single worker

Between 2009 and 2020, the tax wedge for the average single worker decreased by 3.2 percentage points in France. During this same period, the tax wedge for the average single worker across the OECD increase slowly to 35.5% in 2013 and 2015 before decreasing back to 34.6% in 2020.

Employee tax on labour income

The employee net average tax rate is a measure of the net tax on labour income paid directly by the employee.

In France, the average single worker faced a net average tax rate of 27.3% in 2020, compared with the OECD average of 24.8%. In other words, in France the take-home pay of an average single worker, after tax and benefits, was 72.7% of their gross wage, compared with the OECD average of 75.2%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in France was 15.3% in 2020, which is the 17th highest in the OECD, and compares with 12.9% for the OECD average.

This means that an average married worker with two children in France had a take-home pay, after tax and family benefits, of 84.7% of their gross wage, compared to 87.1% for the OECD average.
