**Taxing Wages - Luxembourg**

**Tax on labour income**

The tax wedge is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

---

### Single worker

The tax wedge for the average single worker in Luxembourg decreased by 1.0 percentage point from 38.5% in 2019 to 37.5% in 2020.

The OECD average tax wedge in 2020 was 34.6% (2019, 35.0%). In 2020, Luxembourg had the 17th highest tax wedge among the 37 OECD member countries, occupying the same position in 2019.

In Luxembourg, income tax and employer social security contributions combine to account for 71% of the total tax wedge, compared with 76% of the total OECD average tax wedge.

### One-earner married couple with two children

The tax wedge for a worker with children may be lower than for a worker on the same income without children, since most OECD countries provide benefits to families with children through cash transfers and preferential tax provisions.

Luxembourg had the 29th lowest tax wedge in the OECD for an average married worker with two children at 16.3% in 2020, which compares with the OECD average of 24.4%. The country occupied the 32nd lowest position in 2019.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Luxembourg in 2020, this reduction (21.3 percentage points) was greater than the OECD average (10.2 percentage points).
Tax wedge trends between 2000 and 2020

In Luxembourg, the tax wedge for the average single worker increased by 1.7 percentage points from 35.8% to 37.5% between 2000 and 2020. During the same period, the average tax wedge across the OECD decreased by 1.8 percentage points from 36.4% to 34.6%.

Between 2009 and 2020, the tax wedge for the average single worker increased by 2.6 percentage points in Luxembourg. During this same period, the tax wedge for the average single worker across the OECD increase slowly to 35.5% in 2013 and 2015 before decreasing back to 34.6% in 2020.

**Average tax wedge over time for a single worker**

In Luxembourg, the average single worker faced a net average tax rate of 28.9% in 2020, compared with the OECD average of 24.8%. In other words, in Luxembourg the take-home pay of an average single worker, after tax and benefits, was 71.1% of their gross wage, compared with the OECD average of 75.2%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Luxembourg was 4.7% in 2020, which is the 31st lowest in the OECD, and compares with 12.9% for the OECD average. This means that an average married worker with two children in Luxembourg had a take-home pay, after tax and family benefits, of 95.3% of their gross wage, compared to 87.1% for the OECD average.

Employee tax on labour income

The employee net average tax rate is a measure of the net tax on labour income paid directly by the employee.

**EMployee net average tax rate**

(Employee personal income tax and employee social security contributions) – Family Benefits

Gross wages

In Luxembourg, the average single worker faced a net average tax rate of 28.9% in 2020, compared with the OECD average of 24.8%. In other words, in Luxembourg the take-home pay of an average single worker, after tax and benefits, was 71.1% of their gross wage, compared with the OECD average of 75.2%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Luxembourg was 4.7% in 2020, which is the 31st lowest in the OECD, and compares with 12.9% for the OECD average. This means that an average married worker with two children in Luxembourg had a take-home pay, after tax and family benefits, of 95.3% of their gross wage, compared to 87.1% for the OECD average.
