Taxing Wages - Mexico

Tax on labour income

The *tax wedge* is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

**TAX WEDGE ON LABOUR INCOME**

\[
\frac{(Personal\ income\ tax + \ employee\ and\ employer\ social\ security\ contributions\ (SSCs)) - \ Family\ Benefits\ }{(Total\ labour\ costs\ (gross\ wages +\ employer\ SSCs))}
\]

Single worker

The tax wedge for the average single worker in Mexico remained unchanged at 20.2% in 2019 and 2020. The OECD average tax wedge in 2020 was 34.6% (2019, 35.0%). In 2020, Mexico had the 34th lowest tax wedge among the 37 OECD member countries, occupying the same position in 34th 2019.

In Mexico, income tax and employer social security contributions combine to account for 94% of the total tax wedge, compared with 76% of the total OECD average tax wedge.

**Average tax wedge: average single worker, no children**

![Graph showing tax wedge for single worker]

One-earner married couple with two children

The tax wedge for a worker with children may be lower than for a worker on the same income without children, since most OECD countries provide benefits to families with children through cash transfers and preferential tax provisions.

Mexico had the 24th lowest tax wedge in the OECD for an average married worker with two children at 20.2% in 2020, which compares with the OECD average of 24.4%. The country occupied the 27th lowest position in 2019.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. Across the OECD there was a reduction of 10.2 percentage points for the average married worker with two children. This contrasts with the position in Mexico, where the tax burden was the same for both household types.
