Taxing Wages - Portugal

Tax on labour income

The **tax wedge** is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

**TAX WEDGE ON LABOUR INCOME**

\[
\frac{(\text{Personal income tax} + \text{employee and employer social security contributions (SSCs)}) - \text{Family Benefits}}{\text{Total labour costs (gross wages + employer SSCs)}}
\]

Single worker

The tax wedge for the average single worker in Portugal increased by 0.1 percentage points from 41.2% in 2019 to 41.3% in 2020. The OECD average tax wedge in 2020 was 34.6% (2019, 35.0%). In 2020, Portugal had the 11th highest tax wedge among the 37 OECD member countries, compared with the 13th in 2019.

In Portugal, income tax and employer social security contributions combine to account for 78% of the total tax wedge, compared with 76% of the total OECD average tax wedge.

**Average tax wedge: average single worker, no children**

One-earner married couple with two children

The tax wedge for a worker with children may be lower than for a worker on the same income without children, since most OECD countries provide benefits to families with children through cash transfers and preferential tax provisions.

Portugal had the 16th highest tax wedge in the OECD for an average married worker with two children at 30.0% in 2020, which compares with the OECD average of 24.4%. The country occupied the 17th highest position in 2019.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Portugal in 2020, this reduction (11.3 percentage points) was greater than the OECD average (10.2 percentage points).

Employee tax on labour income

The employee net average tax rate is a measure of the net tax on labour income paid directly by the employee.

In Portugal, the average single worker faced a net average tax rate of 27.4% in 2020, compared with the OECD average of 24.8%. In other words, in Portugal the take-home pay of an average single worker, after tax and benefits, was 72.6% of their gross wage, compared with the OECD average of 75.2%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Portugal was 13.3% in 2020, which is the 22nd highest in the OECD, and compares with 12.9% for the OECD average. This means that an average married worker with two children in Portugal had a take-home pay, after tax and family benefits, of 86.7% of their gross wage, compared to 87.1% for the OECD average.
