

OECD Services Trade Restrictiveness Index (STRI)

SWEDEN – 2020

Key findings

- The 2020 STRI of Sweden is close to the OECD average and relatively low compared to other countries in the STRI sample, unchanged compared to 2019.
- In most services sectors the regulatory environment has become more open in the past few years.
- Legal services are the most open services sector in Sweden while maritime transport is the most restricted.

Recommendation

- Innovation and adoption of technology relies on access to knowledge and to the networks, people, goods and services that carry the knowledge around the world. In this context, Sweden could benefit from more open markets for services trade.

The 2020 STRI of Sweden is close to the OECD average and relatively low compared to other countries in the STRI sample (Figure 1). It is unchanged compared to 2019.

Figure 1. Average STRI across countries, 2020

Note: The STRI indices take values between zero and one, one being the most restrictive. The STRI database records measures on a Most Favoured Nations basis. Air transport and road freight cover only commercial establishment (with accompanying movement of people). The indices are based on laws and regulations in force on 31 October 2020. The STRI regulatory database covers the 37 OECD countries, Brazil, China, Costa Rica, India, Indonesia, Kazakhstan, Malaysia, Peru, Russia, South Africa, and Thailand.

A general regulation that contributes to the STRI in all sectors is a requirement that at least half of the board members and the manager (CEO) in corporations must be residents of Sweden or the European Economic Area (EEA), and there are limitations on the establishment of branches for non-EEA companies. Wage parity with local employees is required for natural persons seeking to provide services in the country on a temporary basis as intra-corporate transferees, contractual services suppliers or independent services suppliers. These categories may stay in the country for up to 24 months on their first entry permit. Rights of access to public procurement are limited to regional trade agreement partners and members of the WTO's Government Procurement Agreement. The standards for cross-border transfer of personal data are set at the EU level. Transfers to non-EEA economies can take place when these ensure an adequate level of data protection or, in the absence of this, appropriate safeguards (e.g. binding corporate rules or standard data protection clauses) are in place. Finally, a minimum amount of capital must be deposited in a bank or with a notary in order to register a business.

Sweden has also been progressively introducing reforms over the past years, contributing to easing the conditions for trade in several sectors (Figure 2).

Services trade barriers are significantly lower within the European Economic Area across all services sectors (Figure 2b). Sweden maintains an open market for services suppliers from other EU Member States.

Figure 2b. Regulatory barriers affecting services trade within the European Economic Area (EEA)

Note: The traditional STRI indicates the level of restrictiveness on Most-Favoured Nation basis towards third countries, and the intra-EEA STRI indicates the level of restrictiveness towards EEA members. Intra-EEA STRI covers 24 countries (Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Iceland, Italy, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden).

Legal services, telecommunications, architecture services and courier services are the sectors with the lowest score relative to the average STRI across all countries (Figure 3). Construction, air transport, distribution services and maritime transport are the sectors with the highest score relative to the average STRI across all countries.

Figure 3. Sectoral breakdown – The least and most restricted sectors in Sweden

Note: Selection was made based on how far the sectors' score were from the world average score, as a percentage difference
i.e. $(STRI_{country, sector} - STRI_{world average, sector}) / STRI_{world average, sector}$

Legal services are the least restricted services sector in Sweden compared to Europe and the other best performers elsewhere while maritime transport are the most restricted (Figure 4).

Special focus: Impact of COVID-19-related measures on the stringency of services regulations

While Sweden has adopted several measures in response to the COVID-19 crisis, these were either temporary in nature or not directly relevant for the measures considered in the STRI database. This includes the extension of partial exemption of certain anti-competitive agreements from competition law in the maritime transport sector, following a 2020 EU regulation. Many countries have tightened their regulatory framework following the COVID-19 shock, by tightening their investment screening process or their visas requirements (Figure 5).

Key reforms

Recent changes affecting Sweden were due to changes in EU law. Regulation 2019/452 allows EU Member States to maintain, amend or adopt mechanisms to screen foreign direct investments in their territory on grounds of security or public order. It applies from 11 October 2020. In the context of the COVID-19 pandemic, Regulation 2020/459 waived the 80/20 grandfathering rule for airport slot allocations between 1 March 2020 and 27 March 2021. Accordingly, airport coordinators are required to consider slots allocated for this period as having been operated by the air carrier to which they were initially allocated. In maritime transport, Regulation 2020/436 extended the existing block exemption to liner shipping consortia from competition law until April 2024.

In March 2019, EU-wide requirements on accounting separation entered into force for port authorities in receipt of public funds. Sweden deregulated fixed line telephony in 2017, and the market for high-quality access to leased lines were deregulated in 2018 following market analyses by the regulator, which found the markets to be competitive. The new EU General Data Protection Regulation (Regulation 2016/679) entered into force on 25 May 2018 providing a comprehensive update on the EU data protection regime.
